

# OMEN X 27 240Hz Gaming Monitor (6FN07AA)

## Overview

Play at your full potential on a monitor that delivers frames at full-throttle speed. From edge to edge, this 240 Hz[1] monitor brings visuals to the next level, with HDR technology that delivers details and contrast like you've never seen before, so you're ready to react fast, return fire, and rank up.

240Hz

### Lightning-fast refresh rates

Outpace your opponent with a 1ms response time and 240Hz refresh rate[1], 4x faster than traditional 60Hz monitors. QHD resolution offers exceptional visual quality, twice the pixel density of FHD monitors. This means less blur, smoother gameplay, and the ability to react faster to all the action all with ultra-sharp graphics.

HDR

### Gaming is in the details, don't miss any

This monitor features HDR technology that provides a range of luminance that delivers vivid details and lifelike contrast between colors. View the brightest of whites and the darkest of blacks for in-game details like you've never seen before. The DCI P3 90% color gamut[1] and profound luminance give you that realistic feel you crave.

### Crystal-clear gaming

Gamers deserve to have smooth gaming combined with the brilliant pixel quality high-dynamic range rendering offers. AMD Radeon FreeSync2™ HDR Technology[2] gives you low latency, wide adaptive refresh rate ranges, and Low Framerate Compensation.

# Features

## DCI-P3 color space

Get deeper hues and more accurate colors with a wider color gamut than sRGB. DCI-P3 90% closely represents colors on displays as they are in the real world.<sup>[1]</sup>

## 240Hz refresh rate

Reduce frustrating lag and image ghosting with a lightning fast 240Hz refresh rate and a 1080p Full High Definition resolution for smooth, crisp gameplay.<sup>[1]</sup>

## NVIDIA® G-SYNC® Compatible

Enjoy variable refresh rates with NVIDIA® G-SYNC™ compatibility, delivering gameplay that's sharp, fluid, and stutter-free with minimal input lag.<sup>[1]</sup>

## Ultra-low latency

Enjoy a rapid, responsive gaming experience with minimized lag. With under 4ms input lag\*, never miss a move.<sup>[1]</sup>

## Console connectivity

Easily connect to your PC, gaming console and peripherals for big screen entertainment with a broad range of ports, including HDMI, 2 Display ports and 2 USB.

## AMD® FreeSync™ 2 HDR

See and feel the difference of fluid, responsive HDR gameplay. Synchronize the refresh rate with your GPU, making display stutter, input lag, and screen tears ancient history.<sup>[2]</sup>

*[1] All performance specifications represent the typical specifications provided by HP's component manufacturers; actual performance may vary either higher or lower.*

*[2] FreeSync™ is only available when it is connected on DisplayPort or HDMI. FreeSync is an AMD® technology enabled on FHD or QHD displays and is designed to eliminate stuttering and/or tearing in games and videos by locking a display's refresh rate to the frame rate of the graphics card. AMD Radeon Graphics and/or AMD A-Series APU-compliant monitors with DisplayPort/HDMI Adaptive-Sync required. AMD 15.11 Crimson driver (or newer) required to support FreeSync over HDMI. Adaptive refresh rates vary by monitor. More information is available at [www.amd.com/freesync](http://www.amd.com/freesync).*
