### Charging

These headphones are equipped with a built-in non-detachable rechargeable battery. Please ensure that the battery is fully charged before using the headphones for the first time. A solid red LED light indicates when the battery is charging. When the charging is complete, the LED light will turn blue. The typical charge time for an empty battery takes 1.5-2 hours. If you do not use the device for a long period of time, please charge it once every 2 months to avoid damage to the battery.

Li-Ion/Li-Po batteries exhibit a gradual decrease in performance over their service life, so a reduction in the initial battery capacity is not an indication of a faulty battery or device.

### Pairing process and LED indications

- Turn off or make sure that your headphones are turned off before starting pairing mode.
- Power on your headphones by pressing Power button for 5 seconds. A fast blinking red/blue LED will indicate that the headphones are ready to pair.
- Turn on the Bluetooth function on your device, select eSTUFF JUNO from the list and pair the headphones.
- A glowing blue LED will indicate that your device has been successfully paired and the headphones are ready to use.
- Once successfully connected, the blue LED Flashes once every 5 seconds.
- If the headphones are disconnected and not used for 5 minutes, the headphones will automatically turn off.

### Bluetooth 5.0 Multilink support

If you want to connect 2 devices to your headphones follow these steps:

- Open first device Bluetooth settings and connect it to your headphones.
- Turn off first device Bluetooth and make sure that headphones are still in the pairing mode.
- Open second device Bluetooth settings and connect it to your headphones.
- Now you can turn on your first device Bluetooth and both devices will be connected to your headphones.

### Twist to Play/Pause

If you take off the headphones and twist them, they will automatically pause the multimedia. Twist them back to automatically play the multimedia again.

### Care and maintenance

- Don't use abrasive cleaning solvents to clean the headset.
- Do not expose the headset to extremely high or low temperature as this will shorten the life of electronic devices, destroy the battery or distort certain plastic parts.
- Don't dispose of the headset in a fire as it will result in an explosion.
- Don't expose the headset to contact with sharp objects as this will cause scratches and damage.
- Don't let the headset fall down onto the floor. The internal circuit might get damaged.

### Waste Electrical and Electronic Equipment (WEEE) Symbol

The use of the WEEE symbol indicates that this product may not be treated as household waste. By ensuring this product is disposed of correctly, you will help protect contact your local authority, your household waste disposal service provider or the shop where you purchased the product.
